

VETMAT AUTOCLAVE, CLASS B, 22 L

- Class B according to European regulations (Standard EN13060) to sterilize, at the medical level, any type of solid load (standard surgical instruments), porous (bagged instruments, tissues, paper, etc.) and hollow (instruments with hollow or mechanical parts). To differentiate from Class N (only for solid instruments and not bagged) and Class S (specific for only the type of load that has been designed).
- 3 vacuum cycles before drying.
- Residual humidity <0.2
- Vacuum pressure up to 0.70 bar
- Sterilizes medical instruments packaged or not, both solid and hollow, efficiently eliminating air from any hollow area of any instrument, ensuring that water vapor reaches any corner.

V/Hz	Power	Capacity	Chamber	Weight
220/50Hz	2300 W	22 litres	250X450 mm	48 kg
